

The 3-in-1 Lock

A Simple Idea Enabling the User to Change Lock Combinations

TO START YOUR 3-IN-1 LOCK:

- The lock is installed by our Professional Locksmith.
- Use the **GREEN** key.

WHEN YOU NEED TO CHANGE THE LOCK:

- Insert the **YELLOW** key and operate the lock. The green key is now disabled.
- Use the **YELLOW** key.

IF YOU NEED TO CHANGE THE LOCK AGAIN:

- Insert the **RED** key and operate the lock. Now the yellow key is also disabled.
- Use the **RED** key.

Need to Change Your Lock Again?

SPADINA SECURITY

LOCK FOR LIFE

LOCK FOR LIFE

The Mul-T-Lock Hercular deadbolt is made with the best materials and meets or exceeds all of the toughest industry standards, classifying it as the best deadbolt available on the market today. Rated: UL, UL437, Ansi Grade1.

LIFETIME WARRANTY

The Hercular deadbolt is designed for "lifetime" protection to provide the highest level of security. It is backed by a lifetime mechanical warranty, a lifetime anti-tarnish finish and is protected by several patents.

CONTROL IS KEY

Today, many locks are easily defeated by drills, hand tools and picking. **Most disturbing is the fact that someone else can make a copy of your key for \$2 at the corner store.**

A common misconception is: "When a key is returned, everything is O.K." This is wrong. Each time an employee, cleaning person or guest has possession of your keys, they can have a copy made without your permission or knowledge. This is when you lose key control.

Over 90% of the keys available in the market today are not protected by a patent. This means that any retailer can copy your key for anyone without asking for identification or authorization.

THE BEST CHOICE

It takes the correct key to open this lock. The Hercular Deadbolt is designed to resist attacks from tools including hammers, drills, pry bars and saws. Unique features like user enabled rekeys (3-in-1) and the interlocking bolt make this your best choice on the market today.

THE BEST KEY

This patented double sided key (two keys in one) gives you confidence knowing that only you can obtain additional keys. Keys are never duplicated. To order keys you must present your key order card and present valid ID.

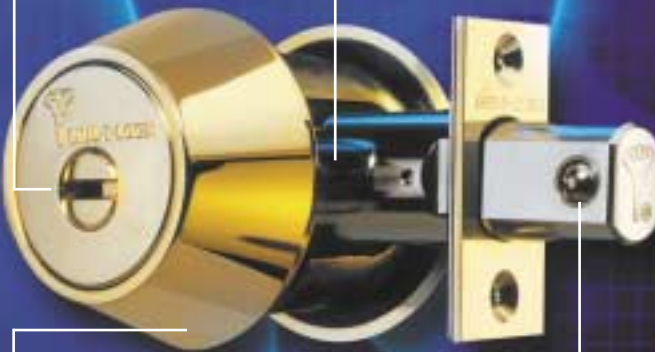

THE BEST BOLT

While the majority of deadbolts offer a 1" bolt, Mul-T-Lock's hardened 1 5/8" offers a serious advantage.

Free spin tapered collar machined from solid brass to protect from wrench attacks.

Steel shroud covers bolt extension to maximize resistance to "ice pick" attacks.

The only deadbolt with hardened steel ball bearing mechanism that interlocks your door to the frame offering the best resistance against kick-ins, pry bars and frame spreading.

MUL-T-LOCK®
Hercular™
TRULY SPECTACULAR

ONE KEY - ENDLESS POSSIBILITIES

All Mul-T-Lock products can be keyed alike, keyed different or master keyed. This means one key for you - for all your locks - and another key for your employees or tenants that only work on the locks you choose. Your key can also work on filing cabinets, padlocks, door knobs and more. One key for every lock you open - instead of a full ring of keys.

THE BEST CYLINDER

The innovative pin-in-pin telescopic tumbler mechanism gives you the protection of ten pins to resist picking attacks.

RETRO-FIT CYLINDERS IMPROVE ANY LOCK
